EXECUTIVE SUMMARY

I am a graduate of SMK Media Informatika with a major in Software Engineering and am currently studying for a bachelor's degree at Matana University majoring in Informatics Engineering. With a strong educational background, I have strong aspirations to work as a Backend Developer in a startup company or a large technology company. I want to continue honing my skills in software development and become an expert in building reliable and efficient backend systems. I am proficient in programming languages such as JavaScript, C++, and Python, and have a solid knowledge of data structures and algorithms. This support is backed by practical experience and understanding of using frameworks such as Node.js and Django. I am ready to apply my knowledge and skills to deliver innovative and high-quality software solutions.

EDUCATION

Major of Informatics Engineering, Matana University Jun 2023 - May 2027

- Relevant Coursework: Artificial Intelligence, Game Development, Data Structures & Algorithms, Digital Entrepreneurship

Major of Software Engineering, Media Informatika Vocational School Aug 2020 - Jun 2023

- Relevant Coursework: Node.js, TypeScript, Data Structures & Algorithms, Digital Entrepreneurship

WORKING EXPERIENCES

IT Intern, Matana University May 2024 - Present

- Participate in IT projects, including software updates
- Collaborate with the IT team to enhance the university's technological capabilities.
- I managed the development of 8 major microsites, enhancing user experience and driving business growth through custom design, responsive development, and robust functionality.

Multimedia Coach, Digikidz Sep 2023 - Present

- Inspire and guide young learners in developing a passion for coding and technology.
- Design and implement interactive and age-appropriate coding lessons for children aged 5-12.

Backend Developer, Nica Store Sep 2022 - Dec 2022

- Developed a Fullstack website using MERN stack for admin.
- Collaborated with designers and other developers to ensure thoughtful and consistent user experiences across the website.

Backend Developer, PT JAYA KONSULTAN INDONESIA Feb 2022 - Mar 2022

- Developed a front-end website using Mobirise web builder.
- Developed a Fullstack website using WordPress.

HONORS & AWARDS

- **Second Winner of PEMATIK10, Budiluhur University**

Nov 2022

As the second winner in a competitive programming competition, I have demonstrated exceptional problem-solving skills, algorithmic thinking, and coding abilities. I have competed against many talented individuals and emerged as a top performer, showcasing my ability to analyze complex problems and develop efficient solutions under pressure.

SKILLS

Language: Bahasa Indonesia(Native), English

Software: Visual Studio Code, Git, Docker

Others: NodeJs, Typescript, MongoDB, GraphQL, C++, Data Structures and algorithms, Problem-Solving, Flexibility, Adaptability, Collaboration, and Teamwork.
